00 PROFILE

Technical Product Manager with a strong software engineering foundation. Bridges business strategy, user discovery, and technical execution. Experienced in scoping ambiguous business domains into production-grade systems, translating user pain points into precise functional specifications, and aligning cross-functional teams across engineering, UI/UX design, and operations.

01 EXPERIENCE

Founder & Product Lead

2024 — PRESENT

Manova — Remote

- Spearheaded product vision for Manova's internal platforms and client ecosystems, scaling modular toolkits to accelerate time-to-market by 4x.
- Conducted extensive workflow discovery with engineering teams to identify developer bottlenecks, leading to the creation of Promux and Orbit platform tools.
- Defined product roadmaps, release milestones, and user journeys across web portals, Telegram miniapps, and developer CLIs.
- Championed cohesive design systems and accessible UI components across all customer-facing client touchpoints.

Technical Product Consultant

2023 — PRESENT

Independent / Enterprise Clients — Tehran

- Conducted on-site discovery with traditional jewelers and OTC merchants to map legacy settlement workflows into digital multi-tenant workflows.
- Specified the dual-currency (Rial & 750-Gold) obligation settlement engine, translating complex offline trade habits into an intuitive UX.
- Led end-to-end design for Goldstein's staff interface (`@goldstein/ui`), ensuring high-contrast visibility and rapid keyboard navigation.
- Scoped restaurant inventory workflows: mapped kitchen waste, supplier relations, and minimum stock alerts into an actionable MVP.

Head TA & Course Coordinator

2023 — PRESENT

University of Tehran — Dept. of Science — Tehran

- Coordinate cross-functional teaching team: define term-wide content milestones, assign module ownership, and conduct weekly alignment sprints.
- Gather continuous student feedback to iterate on problem difficulty curves, improving project completion rates and assignment clarity.
- Standardize grading rubrics and dispute resolution protocols, reducing evaluation variance across 200+ student submissions.

Backend & Systems Engineer

2021 — 2023

LvtGames — Remote

- Partnered with game designers to translate gameplay mechanics into backend contracts, API schemas, and state machine models.
- Analyzed player telemetry data to guide live-ops balancing decisions, retention optimizations, and in-game economy tuning.

02 NOTABLE WORK

Promux ↗

`Go` `CLI` `AI Systems`

High-availability multiplexer for agentic AI CLIs with dynamic failover.

Identified critical failure points in autonomous AI development workflows where account quota exhaustion halted entire development sprints. Scoped, designed, and shipped a minimal, dependable CLI tool solving friction for AI engineers.

Manova / Orbit Platform ↗

`TypeScript` `Go` `PostgreSQL` `Edge`

Composable foundation toolkit for rapid production-grade software delivery.

Treated internal platform as a product: extracted repeated architectural requirements across disparate client engagements into a clean, reusable component ecosystem. Decreased client onboarding and feature lead time significantly.

Dorost ↗

`Typst` `Open Source` `Design System`

Open-source bilingual document composition package for Typst.

Recognized the severe gap in professional, typographically sound document generation for bilingual teams. Designed clear API contracts and comprehensive documentation for academic and enterprise adoption.

03 SKILLS

PRODUCT STRATEGY	User Research & Discovery · PRD Authoring · Roadmapping · Jobs-to-be-Done · MVP Scoping
TECHNICAL BRIDGE	System Architecture · API Contracts · Data Modeling · Technical Trade-off Analysis
DESIGN & UI/UX	Design Systems · Figma · Information Architecture · WCAG Accessibility · Tailwind
EXECUTION	Agile & Sprint Cadence · Stakeholder Management · Release Governance · Telemetry & Metrics

04 EDUCATION

B.Sc. Computer Science — 2021 — PRESENT

University of Tehran — Faculty of Science

Head Teaching Assistant for Advanced Programming · Focus on Systems & Software Engineering
