00 PROFILE

Senior software engineer specializing in resilient systems design and distributed backends. Proven track record architecting high-throughput, fault-tolerant infrastructure and transactional ledgers for financial and mission-critical domains. Deep expertise across Go, TypeScript, PostgreSQL, and AI-native toolchains. Builds for longevity, clarity, and zero-downtime maintainability.

01 EXPERIENCE

Founder & Lead Engineer

2024 — PRESENT

Manova — Remote

- Architected Orbit: shared micro-platform powering all client products with unified RBAC auth, rate limiting, billing journals, and multi-tenant provisioning.
- Engineered Promux: zero-downtime agentic CLI multiplexer with automated account rotation on 429/500 errors and state preservation.
- Designed event-driven backend services deployed on Bun, Go, PostgreSQL, and Cloudflare Edge workers with sub-50ms global latency.
- Established automated release workflows, trunk protection policies, and reproducible local sandbox environments.

Lead Systems Architect

2023 — PRESENT

Independent / Enterprise Clients — Tehran

- Architected Goldstein: multi-tenant SaaS gold trading platform. Designed strict double-entry wallet accounting and real-time over-the-counter (OTC) desk transfers with automated 750-fineness normalization (Effective Grams = Physical × Purity ÷ 750).
- Engineered Restaurant Inventory Management System: multi-branch real-time stock ledger, automated reorder triggers, recipe yield calculations, and supplier procurement pipelines.
- Implemented resilient data synchronization models handling unstable connectivity and concurrent counter transactions without discrepancies.

Head Teaching Assistant — Advanced Programming

2023 — PRESENT

University of Tehran — Dept. of Science — Tehran

- Direct a team of 15+ TAs managing course curriculum, complex programming assignments, and infrastructure for 200+ engineering students per term.
- Architected and maintain the automated CI/CD code judge system, testing containerized submissions against rigorous edge-case suites.
- Designed hands-on project assignments simulating production concurrency, OOP design patterns, and network protocols.

Software Engineer

2021 — 2023

LvtGames — Remote

- Engineered high-concurrency game backend services handling real-time player sessions with low latency constraints.
- Built telemetry pipelines streaming player gameplay events to PostgreSQL and analytics engines for live operational monitoring.
- Optimized query performance and database indexing, mitigating peak-hour bottlenecks during live game tournaments.

02 PROJECTS

Promux ↗

Go · CLI · AI Systems

High-availability multiplexer for agentic AI CLIs with dynamic failover.

Engineered an autonomous proxy layer intercepting agentic CLI calls. Automatically detects HTTP 429/500 errors, executes account rotation with TTL cooling, and preserves session context without interrupting long-running code generation loops.

Manova / Orbit Platform ↗

TypeScript · Go · PostgreSQL · Edge

Composable foundation toolkit for rapid production-grade software delivery.

Production platform containing standardized auth, rate-limiting algorithms, cryptographic payment verification, and multi-tenant database partitions. Reduced infrastructure boilerplate across 5+ client applications.

Dorost ↗

Typst · Open Source · Design System

Open-source bilingual document composition package for Typst.

Authored and published an open-source Typst package on the official registry. Features zero-dependency RTL/LTR mixed-direction layout, isolated numeral transformers, automated CI pipelines with checksum-pinned test font fixtures.

03 SKILLS

ARCHITECTURE	Distributed Systems · Multi-tenant SaaS · Financial Ledgers · Event-Driven · API Design
LANGUAGES	Go · TypeScript · Python · SQL · Rust (basics)
DATABASES	PostgreSQL · Redis · Drizzle ORM · Schema Migration · Connection Pooling
DEVOPS & EDGE	Docker · Cloudflare Workers · Bun · Linux · CI/CD Pipelines · Typst

04 EDUCATION

B.Sc. Computer Science 2021 — PRESENT

University of Tehran — Faculty of Science

Head Teaching Assistant for Advanced Programming · Focus on Systems & Software Engineering
