00 PROFILE

Senior software engineer specializing in resilient systems design and distributed backends. Proven track record architecting high-throughput, fault-tolerant infrastructure and transactional ledgers for financial and mission-critical domains. Deep expertise across Go, TypeScript, PostgreSQL, and AI-native toolchains. Builds for longevity, clarity, and zero-downtime maintainability.

01 EXPERIENCE

Founder & Lead Engineer — 2024 — PRESENT

Manova — Remote

- Architected Orbit: shared micro-platform powering all client products with unified auth, rate-limiting, billing journals, and multi-tenant provisioning.
- Built Promux: zero-downtime agentic CLI multiplexer with automated account rotation on 429/500 errors and state preservation.
- Engineered edge-routed microservices on Bun, Go, PostgreSQL, and Cloudflare Workers maintaining high throughput and 99.9% uptime.

Lead Systems Architect — 2023 — PRESENT

Independent / Enterprise Clients — Tehran

- Architected Goldstein: multi-tenant SaaS gold trading engine with double-entry wallet accounting, OTC desk transfers, and automated 750-fineness normalization.
- Built multi-branch Restaurant Inventory System featuring real-time stock ledger, automated purchase orders, and recipe yield tracking.

Head Teaching Assistant — Advanced Programming — 2023 — PRESENT

University of Tehran — Dept. of Science — Tehran

- Direct 15+ TAs managing curriculum, problem sets, and automated judging for 200+ students per semester.
- Designed and maintain containerized automated testing harness evaluating student code for correctness, memory safety, and concurrency.

Software Engineer — 2021 — 2023

LvtGames — Remote

- Engineered high-concurrency game backend services and low-latency multiplayer session handlers.
- Built real-time telemetry pipelines streaming player game events to PostgreSQL for live balance adjustments.

02 PROJECTS

Promux ↗ — Go · CLI · AI Systems

High-availability multiplexer for agentic AI CLIs with dynamic failover.

Autonomous proxy layer for agentic CLIs. Detects 429/500 errors, executes zero-downtime account rotation with TTL cooling, and preserves running agent session context.

Manova / Orbit Platform ↗ — TypeScript · Go · PostgreSQL · Edge

Composable foundation toolkit for rapid production-grade software delivery.

Standardized platform framework providing auth, token bucket rate-limiting, payment verification, and multi-tenant DB isolation across client microservices.

Dorost ↗ — Typst · Open Source · Design System

Open-source bilingual document composition package for Typst.

Authored open-source Typst package on official registry providing bilingual RTL/LTR layout, numeral conversion, and component design systems with automated CI tests.

03 SKILLS

ARCHITECTURE	Distributed Systems · Multi-tenant SaaS · Financial Ledgers · Event-Driven · API Design
LANGUAGES	Go · TypeScript · Python · SQL · Rust (basics)
DATABASES	PostgreSQL · Redis · Drizzle ORM · Schema Migration · Connection Pooling
DEVOPS & EDGE	Docker · Cloudflare Workers · Bun · Linux · CI/CD Pipelines · Typst

04 EDUCATION

B.Sc. Computer Science — 2021 — PRESENT

University of Tehran — Faculty of Science

Head Teaching Assistant for Advanced Programming · Focus on Systems & Software Engineering
