00 PROFILE

8+ yrs EXPERIENCE · **M.Sc.** ALGORITHMS / UT · **7+** COMPANIES

Technical PM bridging business strategy, user discovery, and engineering execution across fintech, gaming, and AI tooling domains. Maps ambiguous business problems (OTC gold trading, crypto exchanges, multi-tenant SaaS) into precise product specs and intuitive user experiences — fluent in both Figma and distributed systems architecture.

01 CORE ARSENAL

PRODUCT STRATEGY

`User Research & Discovery` `PRD Authoring` `Product Roadmapping` `Jobs-to-be-Done` `MVP Scoping`

TECHNICAL BRIDGE

`Systems Architecture` `API Contracts (REST & GraphQL)` `Data Modeling` `Technical Feasibility Analysis`

DESIGN & UI/UX

`Design Systems` `Figma` `Information Architecture` `WCAG Accessibility` `Tailwind CSS`

EXECUTION & OPS

`Cross-Functional Leadership` `Feature Ownership` `Sprint Cadence` `Release Governance` `Telemetry & Metrics`

DOMAIN EXPERTISE

`Multi-Tenant B2B2C` `Financial Ledgers & Crypto Exchanges` `AI Agent Tooling` `Gaming Backends`

02 PRODUCTS & OPS

Promux ↗

`Go` `CLI` `AI Systems`

Autonomous multiplexer for agentic AI CLIs with zero-downtime account rotation.

Identified quota exhaustion as a critical bottleneck halting AI engineering sprints. Scoped, specified, and shipped a zero-dependency CLI tool adopted across active engineering workflows.

Manova / Orbit Platform ↗

`TypeScript` `Go` `PostgreSQL` `Edge`

Standardized foundation platform for AI-native and client microservices.

Managed Orbit as a platform-as-a-product: extracted recurring client requirements into a shared, composable toolkit that accelerated client project time-to-market by 4x.

Dorost ↗

`Typst` `Open Source` `Design System`

Open-source bilingual document composition package on official Typst registry.

Identified the severe tooling gap in bilingual document generation; designed clean API contracts and comprehensive documentation for academic and enterprise adoption.

Distributed UUID Generation System ↗

`Go` `RabbitMQ` `Hetzner Cloud`

High-throughput distributed 32-byte UUID generation platform.

Undergraduate thesis project at Babol Noshirvani University of Technology, demonstrating end-to-end systems architecture and benchmarking under distributed loads.

03 EDUCATION

Master of Computer Engineering — Algorithms and Computation — 2024 — PRESENT
University of Tehran
Head Teaching Assistant for Advanced Programming · Research in distributed algorithms

Bachelor of Computer Engineering — 2018 — 2024
Babol Noshirvani University of Technology
Final Project: Distributed UUID Generation System

04 HONORS

`2nd Place`	Golang (Bale) Software Engineering Selection	2023	`Top 20`	DevOps (Digikala) Boot Camp Selection	2022
`Top 30`	CyberSecurity (Quera) Competition	2023	`Top 30`	Software Engineering (Digikala) Bootcamp	2022
`Top 20`	DiffCode (Quera) Algorithmic Contest	2019	`Top 300`	Codeforces Round 611 (Div. 3)	2019

05 EXPERIENCE

Technical Product Consultant (Freelance)
2025 — PRESENT

Independent / Enterprise Clients — Tehran

Architecting mission-critical platforms and automations for enterprise businesses.

- Conducted on-site discovery with traditional jewelers and OTC merchants to map legacy settlement workflows into Goldstein's digital multi-tenant UX.
- Led UI/UX design of Goldstein's staff interface (`@goldstein/ui`), cutting transaction record time by 60% for non-technical retail store clerks.

TECH: Next.js 16 · React 19 · NestJS · Bun · PostgreSQL · Tailwind 4 · Redis

Founder & Product Lead
2024 — PRESENT

Manova — Remote

AI workflows, shared platform engineering, and client infrastructure.

- Spearheaded product vision for Manova's internal platforms, scaling modular toolkits to accelerate client time-to-market by 4x.
- Conducted developer workflow discovery to identify AI engineering bottlenecks, directly driving the requirements and delivery of Promux.

TECH: Go · TypeScript · Bun · PostgreSQL · Docker · Cloudflare Workers · Typst

Head TA & Course Coordinator
2024 — PRESENT

University of Tehran — Dept. of Science — Tehran

Leading teaching staff and curriculum infrastructure for competitive CS engineering course.

- Manage cross-functional TA team of 15 members; define semester roadmaps, assignment delivery schedules, and evaluation standards.
- Gather continuous student feedback to iterate on problem difficulty curves, improving project completion rates and assignment clarity.

TECH: Java · Automated Judging CI · Docker · Concurrency · OOP Design Patterns

Software Engineer & Feature Owner
AUG 2024 — 2025

LvtGames — Turkiye (Remote)

High-concurrency gaming and entertainment platform.

- Took full product and feature ownership of specific core platform features, acting as Product Manager.
- Managed and coordinated cross-functional teams (including UI/UX design and frontend) to drive end-to-end delivery from initial concept and requirements gathering to successful launch.

TECH: Java 21 · Spring Boot 3 · Go 1.24 · PostgreSQL · Redis · GCP · Terraform · Liquibase

Backend & Systems Engineer
MAY 2025 — JUL 2025

SwapWallet — Tehran

Seamless crypto trading exchange and wallet platform.

- Managed feature design and user flows for crypto exchange trading features and wallet operations.
- Designed user interactions and functional specifications for operational Telegram bot automating exchange alerts.

TECH: Apache Kafka · Kotlin · Kubernetes · Spring Framework · PostgreSQL

Backend & Data Engineer
FEB 2024 — OCT 2024

Ultratrader — Tehran

Smart trading journal & portfolio manager for financial markets.

- Collaborated with financial traders to translate portfolio analysis requirements into intuitive GraphQL query schemas.
- Prioritized broker integration roadmap based on user asset distribution and transaction volume.

TECH: NestJS · PostgreSQL · Redis · Docker · GraphQL

Backend & Pipeline Engineer
MAY 2022 — DEC 2023

Ravindex — Tehran

Financial analysis platform for Tehran Stock Exchange.

- Translated quantitative stock market analysis methodologies into automated data pipeline requirements.
- Monitored pipeline error rates and data freshness metrics to ensure SLA compliance for financial analysts.

TECH: Django · PostgreSQL · RabbitMQ · Docker · Prometheus · Grafana

R&D & Systems Engineer
2016 — 2022

Earlier Engineering: Plotset & Cubecraft — California, US & London, UK (Remote)

AI visual tools R&D and high-scale multiplayer game network engineering.

- Plotset: Researched user workflows for data visualizers to simplify chart and map creation for non-technical users.
- Cubecraft: Analyzed player engagement across minigame modes to optimize state transitions and game mechanics.

TECH: Node.js · D3.js · Java · SpigotMC API · MongoDB

06 CREDENTIALS

Software Engineering Bootcamp
Digikala · Sep 2022
Backend, APIs, database architecture, design patterns, cross-functional collaboration.

Machine Learning Specialization
DeepLearning.AI · Mar 2023
Neural networks, loss optimization, and engineering practices for ML systems.

Cybersecurity Advanced Workshop
Quera & National Banking · May 2023
Web security, reverse engineering, and applied cryptography with national banking specialists.
